### 1. Introduction / welcome

This integrated skills module provides a clear outline of the history of democracy and contemporary politics, with a wide range of practice activities.

## 2.0. Module Description

### 2.1 Overall Module aims:

The module covers the development of Political History from ancient Athens to the present. Historical development based on chronological structure will be studied together with economic, social, and political phenomena. The class format will include lectures, discussion, presentations, and audiovisual materials. The students will be asked to do a small research project, utilizing information technology.

### 2.2 Subject Specific Module aims:

Written specially for Japanese students by an expert in political science, the module takes a look at democracy around the world from its beginnings in ancient Greece to the modern world. Written in clear, easy-to-understand English, the module requires no previous knowledge, and will give students a clear understanding of law and politics.

### 2.3 Skills and abilities

A wide variety of comprehension exercises provide practice in basic skills. Students of politics, law and economics will doubtless find this a very useful text for English study, but it will also have wide appeal for non-specialist students of English.

### 2.4 Applied learning

Students can apply their skills and knowledge in NGOs, during internships and through field research.

## 3.0. Learning outcomes

### 3.1. Learning outcomes - overall

Be able to function in global society and contribute as citizen.

### 3.2. Learning Outcomes - Specific

and out into the

world at large with a greater understanding of the differences that exist between human beings.

- b. have a good understanding of some of the problems facing the world today
- c. have skills to read and critically think about current news presented in articles.
- d. listen to others' opinions and reflect on the importance of listening to others
- e. interject into a conversation or discussion, share their opinions on a topic and give logical reasons for their opinions
- as well as change the direction of a conversation.
- f. build their critical thinking skills.

monitored throughout the course. Following receipt of the report at the end of the semester, the module leader will provide students with formative feedback on their comprehension, writing and research skills.

## 8.0 Assessment and practical tasks:
